

GLASSMATE Graphite[®]

Provide maximum flexibility and improve bottle guide alignment

BOTTLE GUIDES

Entegris' POCO Materials are specifically designed for use in hot glass-handling applications. Developed by our experienced field services engineers to address customer concerns with alignment and spacing, our bottle guides allow for maximum flexibility on the line with minimal maintenance. These guides improve bottle alignment, are low maintenance, and provide a lower cost of ownership.

V-Spacer

The V-Spacer guide is designed to reliably align bottles as they enter the two belt Lehr entrance system on a quad machine. Asymmetrical arms adjust independently for easy adjustment.

Split V

The Split V guide was designed for use with single conveyor, multiple gob machines. Pads are adjustable and easy to install.

GRAPHITE INSERTS

Quick change graphite inserts slide and lock into place. Inserts are reversible for double the life and can be ordered separately.

ORDERING INFORMATION

V-Spacer and Split V guides are special order items requiring additional production time. Both are available in 12" and 18" lengths. Please contact Entegris for ordering information.

V-Spacer

1.9" width at hub

Adjustable width from 3.75" to 5.50"

Split V guide
